

Jan/Feb 2026 Newsletter

Welcome

Welcome to the first Mt Cass Wind Farm newsletter for 2026. It's been an exciting start to the year as we break ground on the project.

On January 6th, work commenced around the site entrance which is at the top of Mt Cass Road. These initial works include a site compound and laydown area and will progress to site roading in March/ April.

We thank local residents and road users for their patience with any disruption over this time.

Mt Cass wind farm is also grateful for access agreements with Transwaste Canterbury Ltd which allows for heavy traffic to transit through their site thereby removing much of the load from Mt Cass Road.

Warm regards,

Mt Cass Wind Farm Team

PROGRESS ON SITE

CIVIL CONSTRUCTION	
Site Compound/ Laydown area	Underway
Site Roding	Underway
OFFSITE WORK	
Siemens wind turbines	Ordered
Roding within Transwaste site	Underway

Community engagement

The project manager was invited to meet with the Glenmark Lions Club on Tuesday, 24th February to deliver a presentation on the Mt Cass Wind Farm and hear directly from members. The discussion was constructive and provided an excellent forum for answering questions and sharing information.

The community is represented by our community liaison group members. Further details about each member can be found on our website.

Project insights

Civil works

Initial roading works is focused on building the main access road to the top of ridgeline prior to winter this year.

Substation

Commencing early 2027.

Wind turbines

Arriving to Timaru Port July/ August 2027.

Key highlights

- Civil construction is underway onsite at Mt Cass near Waipara NZ.
- Taylors Contracting is busy establishing site compound and laydown area.
